Fibre & Fertility on Frame

Measured Performance Data

* - Used in Ram Lamb SYN. (AI backup)

Tag - Visual individual identification

Sire - Sire of ram (see sire summary)

GFW% - Greasy fleece weight as a percentage of the sale rams

Poll - Horn - If known indicates whether the ram carries the double poll or poll horn gene.

BWT - Body weight in kilograms

DOB - Date of birth

Mic - Micron is the average thickness of fibres in a wool sample

S.D. - Standard deviation is a measure of the variation of the thickness of the fibres tested. The figure quoted in microns is the range below and above the **Mic value** that approximately 68% of the fibre tested fall into.

C.V. - Co-efficient of Variation of **Fibre diameter** a measure of the variation of the thickness of fibres tested, but is expressed as a percentage of the fibre diameter

%>30u - Prickle factor is the percentage of fibres stronger than 30 microns in a sample

Australian Sheep Breeding Values (ASBVs)

MERINOSELECT is delivered by Sheep Genetics and information is calculated from an analysis of pedigree and performance information contained in MERINOSELECT database. An Australian Sheep Breeding Value is an estimate of the genetic potential a sheep will pass on to its progeny. Sheep are ranked for various production characteristics using the Australian Sheep Breeding Values (ASBVs). **ASBVs are designed to be used in conjunction with the visual selection methods to select sheep that match your breeding objectives**

Yearling Clean Fleece Weight (Ycfw) - A positive Fleece Weight ASBV means a genetically heavier cutting animal. Fleece weight ASBVs are quoted in percentages. ASBVs are deviations from the average of the animals in the database in the 1990 drop. An ASBV of +20% means the animal will cut 20% more wool than the average in 1990. A ram with an ASBV of +20% will pass half of this benefit onto his lambs, that is +10%.

Yearling Fibre Diameter (Yfd) - Fibre diameter ASBVs are quoted in microns and are expressed as the deviation from the average of animals in the database in the 1990 drop. The more negative the number the finer the animal. An ASBV of -1.6 means the animal will produce wool that is 1.6 micron finer than the average in 1990. A ram with an ASBV for FD of -1.6 will pass half of this benefit onto his lambs, that is -0.8.

Yearling Staple Length - Staple length ASBVs are quoted in millimetres and are expressed as the deviation from the average of animals in the database in the 1990 drop. An ASBV of +10 means an animal will produce wool that is 10mm longer than the average in 1990. A ram with an ASBV for staple length of +10 will pass half of this benefit onto his lambs, that is +5.

Yearling Weight (Ywt) - Weights are measured in kilograms and ASBVs are quoted in kilograms. ASBVs are deviations from the average of animals in the database in the 1990 drop. So an animal with a Ywt ASBV of +6kg will pass half of this benefit onto his lambs, that is +3kg.

Yearling Eye Muscle Depth (Yemd) - Measure in millimetres Rams with more positive ASBVs for EMD will produce progeny that have more muscle, independent of weight, and a higher lean meat yield.

Yearling Fat (Yfat) - Fat ASBVs are measured and quoted in millimetres. They are deviations from the average of animals in the database in the 1990 drop. An animal with a FAT of +0.6 will genetically have 0.6mm more subcutaneous fat than the average in 1990. A ram with an ASBV of +0.6 for FAT will pass half of this benefit onto his lambs, that is +0.3mm

Merino Production (MP+) - The Merino Production indexes are based on a production system where the income is a combination of wool and surplus sheep sales. The MP index focuses on genetic improvement of fleece weight, fibre diameter and body weight. The MP+ index additionally includes staple strength and reproduction.

21/07/2020 Australian ASBV averages

Ycfw	Yfd	Ysl	Ywt	Yemd	Yfat	MP+
14.1	-1.0	6.3	4.6	0.4	0.1	142

All Sale Rams:

- May 2019 drop
- Wool tests current fleece
- Shorn 25th March 2020
- B/Wt recorded 4th August 2020
- ASBV's taken 21st June 2020

Sires

KW170268 - KARAWATHA PARK Purchased on property 2018

L173071 - LEAHCIM purchased on property 2018

L173114 - LEAHCIM Semen Sire

BK12 - BROOKDALE 014012 x LEAHCIM 110858

S970 - SOHNIC purchased 2018 Classing Classic

KP325 - KAMORA PARK 325 x KP333 X KP304 Purchased 2017

RLS SYN'19 - RAMSGATE RAM LAMBS Back up A.I. ewes

RA144 - RIDGWAY ADVANCE purchased 2018 Classing Classic

RA393 - RIDGWAY ADVANCE purchased on property 2018

RIFLE.303 - BANAVIE Semen Sire

SYN'19 - Syndicate of Stud Sires

GP170614 - GLENLEA PARK Semen Sire

W5542 - WILLERA purchased Hamilton Sheepvention 2018

SALE CATALOGUE DISCLAIMER

All reasonable care has been taken by the vendor to ensure the information provided in this catalogue is correct at the time of publication.

However, the vendor makes no representations about the accuracy, reliability or completeness of any information provided in this catalogue and do not assume any responsibility for the use or interpretation of the information in the catalogue.

SAFETY DISCLAIMER

The Owners, Employee's and representatives of the Stud do not accept liability for any incident that may occur at the venue or surrounds.

Although such occurrences are rare any persons attending the Sale do so at their own risk.
